

JONATHAN D. KASLOW

AI Infrastructure & Agentic Systems Leader | Product Strategy | Cross-Functional Executive Partnership

Miami Beach, FL • (323) 459-7978 • jonathan.kaslow@gmail.com

EXECUTIVE SUMMARY

AI infrastructure leader who builds and operates production agentic systems, deploys and optimizes local LLMs, and architects the platforms that carry AI from prototype to daily operational use. Fifteen years of cross-functional leadership across technology, cybersecurity, and entertainment — including P&L ownership, contract negotiation, and global team coordination — bring the organizational and strategic judgment to lead AI initiatives at the executive level. Equally fluent configuring a multi-GPU model-serving environment and presenting a phased integration roadmap to a board.

PROFESSIONAL EXPERIENCE

AI Product & Infrastructure Lead CyberSagacity · Remote

Jan 2025 – Present

Agentic AI Architecture & Local Model Deployment

- Designed an agentic AI stack integrating Cursor Pro (overseer / triage), OpenClaw, and Hermes agent gateways, enabling continuous AI-assisted development, communications, and workflow automation.
- Deployed and administered agentic AI systems in production, configuring multi-channel integrations across Telegram, WhatsApp, Slack, and Discord with persistent conversational context for 24/7 AI-assisted operations across every team communication surface.
- Stood up local LLM inference on a dedicated NVIDIA GPU workstation running Ollama, serving models (Llama 3.1, Gemma 4) over LAN to OpenClaw via SSH tunnel for low-latency, privacy-preserving AI independent of cloud APIs.

Containerization, DevOps & Platform Engineering

- Led containerization of the flagship product, SATriage, with Docker — architecting a full Ubuntu/Debian deployment with user permissions, SSH access, and entrypoints for portable, reproducible, AWS-aligned distribution.
- Engineered Docker build systems spanning base images, dependency layering, and cryptographic key management, resolving license-validation challenges for consistent cross-environment runtime behavior.
- Configured automated AI-driven email scanning, security-audit workflows, and cron-based intelligence-delivery pipelines using OpenClaw's native scheduling and agent framework.

Product Strategy & Executive Partnership

- Co-authored the 2026 AI Integration Strategy with executive leadership, defining a phased roadmap across NLP query interfaces, intelligent report generation, automated AST rule collection, and attack-chain visualization.
- Championed MCP as a strategic wedge into the legacy AppSec install base, positioning SATriage as a “telemetry intelligence control plane” that transforms scanning-tool output into agent-consumable intelligence.
- Architected an AI-driven ingestion pipeline normalizing 30+ application-security scanners (Semgrep, SonarQube, Checkmarx) into a unified rule-intelligence database with automated CWE / severity mapping.
- Advised the executive team on CRM strategy, GTM positioning, and product-market fit for SATriage, contributing to sales-enablement frameworks and go-to-market strategy.
- Supported enterprise sales engagements with live demonstrations of SATriage and companion tool SATraits at the Gartner Cybersecurity Conference, presenting risk evaluation and triage recommendations for scanning-tool selection.
- Partnered with the founder on the strategic vision for AI-driven comparative analysis between SATriage's intelligence-based rules and published industry rules, enabling systematic evaluation of coverage gaps and detection logic.

Founder & Artist Manager Kaslow Media Management · New York, NY

Mar 2012 – Dec 2024

- Managed a portfolio of Grammy-nominated, major-label artists with 1B+ cumulative streams, owning all business operations, strategic planning, and revenue optimization across a 12-year engagement.
- Directed cross-functional teams across record labels, booking agencies, publishers, and brand partners to execute integrated campaigns spanning 10+ external stakeholders per project.
- Led contract negotiations and brand strategy producing six-figure deals with major consumer brands; built artist-development roadmaps balancing creative vision with commercial objectives.

Musical Director & DJ KiD CuDi · New York, NY

Jan 2009 – Feb 2012

- Directed creative and technical execution for a multi-platinum, Grammy Award-winning artist across global tours, major festivals (London Wireless, Lollapalooza), and televised performances.
- Led planning and execution of 100+ live performances across international markets, managing logistics, production workflows, and cross-functional coordination spanning band, crew, visual design, and venue stakeholders.

A&R Production Manager Concord Music Group · Beverly Hills, CA

Nov 2005 – Sep 2008

- Led a digital-transformation initiative to build a centralized archive of Concord’s master catalog (Fantasy, Stax, legacy labels), defining the metadata schema for 10,000+ master recordings and enabling new licensing revenue streams.
- Managed a cross-functional project transitioning analog production workflows to UMG’s WAM!NET digital platform, reducing manufacturing turnaround and improving operational efficiency.

AI & TECHNICAL PROJECTS

Hybrid AI Infrastructure — Personal Production Environment

2025 – 2026

Built and operate a hybrid local/cloud AI infrastructure: an NVIDIA GPU workstation serving open-source LLMs via Ollama over LAN/SSH, integrated with an OpenClaw AI gateway on macOS for persistent agentic operations across Telegram, WhatsApp, Slack, and Discord. Includes MCP tool integrations (GitHub, Notion, Slack, Cloudflare, Stripe), automated email-intelligence cron jobs, and LaunchAgent service management. Performed model evaluations, KV-cache compression research (TurboQuant), and multi-GPU debugging.

Local AI Consultancy Model — Business Development

2025 – 2026

Developed a GTM framework for deploying managed local AI systems as “virtual employees” for SMBs — privacy-preserving, zero-cloud-dependency AI automation for non-technical business owners.

Tory Burch AI KPI Assistant — University of Miami Capstone

2025

Shipped a React/Vite AI-powered supply-chain analytics tool that lets non-technical stakeholders query complex KPI data conversationally via the Claude API, eliminating the need for SQL or BI-tool training.

EDUCATION

University of Miami — M.S. in Business Technology · National Society of Leadership and Success (NSLS)

Hofstra University — B.A. in Anthropology

SKILLS & COMPETENCIES

- Agentic AI & Orchestration:** Agentic Workflow Design · MCP Architecture · AI Agent Configuration & Orchestration · Multi-Channel AI Gateway (OpenClaw) · Tool-Use Optimization · Function Calling · Cursor AI IDE · Prompt Engineering
- Local AI & Model Ops:** Ollama · Local LLM Deployment & Serving · Model Evaluation (Llama, Nous Hermes, Mistral) · Multi-GPU Configuration · SSH/LAN Model Serving · NVIDIA CUDA · Hybrid Cloud/Edge AI
- Infrastructure & DevOps:** Docker · Containerization · AWS (ECR, EC2) · Linux/SSH · Deployment Architecture · LaunchAgent / Service Management · CI/CD Pipelines
- AI / ML:** Conversational AI · RAG Pipelines · Generative AI · LLM Integration (OpenAI, Gemini, Claude) · Vector Databases · AI Product Design
- Product & Strategy:** Roadmap Planning · Requirements Definition · Stakeholder Management · Cross-Functional Leadership · GTM Strategy · Product-Market Fit · Sales Enablement · Agile
- Technical:** Python · SQL · APIs · Cloud Platforms (AWS, GCP, Azure) · Data Pipelines · KPI Dashboards · Analytics (Tableau, BigQuery)
